ABOUT ME

Graphic designer, *seven years* of stories.

I'm a graphic designer with seven-plus years of experience working across branding, editorial, packaging, and digital identity. Moving between industries has meant learning each one from the inside — the conventions, the audiences, the small details that make a mark feel native rather than borrowed. This portfolio is deliberately a polyglot: a set of projects that each speak in a different visual language, because I've never believed a single style should be the whole of a design practice. Take a look through the work below and see what fits what you're building.
